

## NEW MACHINE ACQUISITION

## POREBA TCG-200 X 14M HEAVY DUTY LATHE

**FALL  
2025**

We are excited to announce the acquisition of a **Poreba TCG-200 x 14M Heavy Duty Conventional Lathe**, further expanding our machining capabilities.

This powerful lathe offers an impressive **swing capacity of 2 meters (78.74 inches)** and a **length capacity of 14 meters (46 feet)**, allowing us to handle larger and more complex projects with precision and efficiency.

With a weight capacity of **66,000 lbs between centers**, and up to **88,000 lbs with two steady rests**, this addition strengthens our ability to meet the demands of heavy-duty machining.

The machine is scheduled to be **operational by early fall 2025**.
